Description

**Description**

**Own your Future. Impact what matters!**

A cleaner, safer and healthier world – this is our mission. Ecolab is the global leader in water, hygiene and energy technologies and services. With a global workforce of over 48.000 employees, our company has developed a unique corporate culture – together we handle important tasks in order to protect our planet and our vital resources.

Building customer trust and loyalty is the key to success in the Food Retail business. From spotless floors to sparkling equipment, every corner of the store needs to be clean, safe and inviting. Food safety is paramount in this environment, where a single foodborne illness outbreak can have devastating consequences. That is why we developed the most comprehensive Food Retail Services program available. We provide a wide variety of market-specific products and equipment and customized on-site service and training — all focused on elevating our customers’ food safety practices and operational efficiency.

**We are currently looking for a Working Student (f/m) Biocides (1-year-contract) based in Leiden**

**Your Responsibilities will be:**

- Assisting the European Regulatory Affairs biocide team with record management of BPR dossier related data;
- Assist with local dossier preparation to ensure legal compliance and on-time delivery;
- Work with internal Ecolab systems to process registration workflows and document registration activities;
- Participate in Ecolab’s cross-divisional coordination efforts;
- Gather and review internal data and test reports to ensure formal compliance;
- Support in business support tools to have easy and customer friendly setup;
- Maintain budget planning for applicable projects and report to management.

**Your Profile – impressive**

- Enrolled student in chemistry, toxicology, food chemistry or any related life science degree;
- Ideally experienced within an internationally operating company and used to work in a virtual team;
- Good problem-solving and organizational skills, conscientious and detail-oriented, proactive with an ability to communicate and cooperate independently to collaborate with internal and external stakeholders on a virtual base;
- Fluent English with good written and verbal communication skills;
- Good MS Office skills.
